KARDIE EQUIPMENT TO ATTEND POWERGEN INTERNATIONAL IN NOVEMBER

New Orleans, LA - Kardie Equipment (A TGM Wind Company) is thrilled to announce their participation in the 2019 [POWERGEN International](#) trade show for the third straight year. Exhibiting in booth #2119, Kardie will be right in the thick of the action, surrounded by well-respected companies such as [McDermott](#) and [Black & Veatch](#).

Along with the state-of-art promotions trailer, the Kardie booth will feature the Bronto Skylift S 150 XDT, with a working height of 150 feet (46 meters). This unit is currently for sale and will be offering special “show pricing”.

Some features of this model include robust Cat chassis, auto-leveling outriggers, 360° continuous rotation, a working platform of 3 ft x 7 ft with a basket capacity of 1,500 lbs, voice-in-command intercom, integrated in-basket water/electricity/air, and more.

Kardie Equipment will be taking meetings at the booth and answering questions about the rental fleet, units for sale, parts and maintenance hotline, and a number of other topics. Founder and CEO Kevin Darby will be in attendance, along with the entire Kardie and TGM Wind Sales staff.

POWERGEN International is quickly becoming the premier networking event for electricity generators, utilities, and all solution-providers engaged in the industry of power generation. Kardie Equipment, as TGM Wind Services, has been operating primarily in the wind and renewables sector in its 10 year history, but has expanded to work with businesses in power generation, as more and more organizations discover the versatility of the Bronto Skylift.

POWERGEN International 2019 will take place in the [Ernest N. Morial Convention Center](#) in New Orleans, starting on November 19 and ending on November 21. Kardie Equipment is setting up meetings ahead of time with interested parties, and those that set up meetings (which can be done [here](#)) are eligible to receive a free exhibitor badge from Kardie Equipment.

About Kardie Equipment (TGM Wind Services)

As the industry leader, Kardie Equipment (TGM Wind Services) is the largest North American distributor for Bronto Skylift in Finland. Since 2010, their fleet of 20 units has pioneered access and cleaning in the renewables sector for the world's largest wind companies. On the heels of the company's success over the last decade, Kardie has expanded their capabilities to include various new products and services that will allow them to continue growing and penetrate new industries. Kardie Equipment provides the safest, most efficient, and most reliable aerial work platforms across various industries up to 295 feet.

About Bronto Skylift

Bronto Skylift is a global market leader in truck mounted, hydraulic aerial platforms. They design, manufacture, sell and service appliances for rescue and firefighting, as well as for construction work. The product range includes approximately 50 models between with a range of 17 to 112 meters working height. The headquarters and production plants are situated in Finland, with additional subsidiaries in Germany, Sweden, Switzerland and the USA. The company is a part of Japan-based Morita Holdings Corporation.
